### **ABSTRACT**

Since 2001, the Exploration on the Guyane Maritime block offshore French Guiana was a long and fascinating journey. Comforted by the lessons learnt from our long-standing exploration Experience of the area, and working with determination and perseverance to clear the path for future successes, Total is setting the stage for a new chapter. Exciting new prospects are being prepared for drilling on this large license with proven oil potential. The spud of Nasua-1 well is planned late 2018.
