

## **HP West Central Africa and the Oil&Gas Industry**

### **Fouad Jellal**

HP Morocco-Tunisia-Libya-French West Central Africa and West Indies

You're constantly faced with fluctuating margins, challenging political environments, regulatory constraints and capacity pressures. To thrive in this environment you need solutions that help you meet the world's ever increasing demands for energy.

HP industry-standard solutions for oil and gas can help you deploy infrastructures that span the entire workflow to increase production yields and steadily grow revenues and margins. These solutions enable your organization to:

- Collaborate better across a broader set of constituents
- Execute more effectively to achieve operational efficiencies
- Innovate to optimize business outcomes
