

## **Powering the Future of Data in Oil and Gas**

**Kenneth Smith<sup>1</sup> and Ryan Templeton<sup>1</sup>**

<sup>1</sup>Hortonworks

### **Abstract**

Discover how energy companies are leveraging open source technologies from Hortonworks to:

- Stream data into an open industrial data platform lowering long-term data storage and processing costs,
- Enable distributed computing of oilfield data on premise or in the cloud,
- Integrate and analyze data sets from siloed OT, IT, & G&G sources,
- And democratize data science to deliver data-driven insights across all lines of business
